Noel Ardoin, P.E.

Environmental Engineer Administrator

FROM:

Ray A. Mumphrey, P.E.

Assistant Bridge Engineer Administrator

DATE:

February 13, 2015

SUBJECT:

Request to Initiate Phase I Environmental

With this memorandum, we are requesting that your office initiate the environmental clearance process for the captioned project.

We have been working with the local governments to build support for the project.

A couple of the alternatives that have been identified during Phase 0 Feasibility are as follows:

- Construction of a new bridge at Church Street aligned with St. Clair Avenue, phase constructed maintaining traffic along the existing alignment or with a detour bridge at Highland Park Drive.
- Construction of a new bridge at Church Street maintaining existing alignment with a detour bridge at Highland Park Drive.
- The detour bridge at Highland Park Drive requires rerouting traffic from La. 1 to Highland Park Drive and back to Church Street. There has also been discussions with the local governments about constructing the detour bridge as a permanent bridge with other funding provided to offset the additional cost beyond the cost of the temporary detour.

Copies of the layouts and typical sections are attached for your reference.

If you have any questions please contact Mr. Kian Yap at 379-1330 or kian.yap@la.gov.
